Cover Letter:

Please see below of my profile for the subject role.

I am writing to express my interest in the computer programming position within your company. As a skilled computer programmer with a passion for solving real-world problems, I am confident that my extensive experience and knowledge in software development principles and methodologies make me an ideal candidate for this position.

As you can see from my resume, I am currently pursuing my Computer Programming and Analyst degree at George Brown College, and I am expected to graduate in February 2023. I have completed relevant coursework in semesters 1 to 5, where I designed and developed a customer relationship management website using Laravel, receiving a perfect score and demonstrating strong problem-solving and development skills.

I have also analyzed, developed, and maintained robust computing system solutions through validation testing and industry best practices. I am proficient in a wide range of programming languages, including HTML, CSS, React, JavaScript, C#, C++, TypeScript, PHP, Python, Swift, and NoSQL.

I have a strong understanding of software development principles and methodologies, including agile development practices. I have experience developing and implementing algorithms to solve complex problems, and I am familiar with software development tools, including Visual Studio, PyCharm, and Android Studio.

I am proficient in version control systems such as Git, and I have experience working collaboratively with remote teams using GitHub. I am also familiar with cloud computing platforms such as AWS, Azure, and Google Cloud Platform, and I have knowledge of database design and management, including experience with SQL and NoSQL databases.

In my professional experience, I have demonstrated strong time management skills by prioritizing the creation of the required number of products to meet business targets and ensuring timely delivery. I have proven ability to check and qualify the quality of created products and make necessary improvements, as well as ensuring that teammates' products meet the company's high-quality standards. I have fostered teamwork by supporting and mentoring new team members and reviewing

their work to identify and correct errors.

I have integrated acquired knowledge to develop and propose effective solutions to upcoming problems while adhering to established protocols and standards. I also have experience as a computer freelancer, where I consulted with clients to understand their website design requirements and vision, and provided technical solutions to bring their ideas to life.

I developed marketing strategies, established brand identity, set appropriate pricing, and built and maintained networking websites. I demonstrated excellent attention to detail and ability to complete tasks according to requirements and deadlines, and used a logical approach to tackle complex projects while explaining technical concepts clearly to clients.

In addition, I have volunteer experience where I proficiently operated standard gardening equipment and hand tools, including a wheelbarrow and garden cart, maintained the desired level of grass, and ensured the upkeep of the community garden. I am passionate about learning and staying up-to-date with the latest technologies and programming languages. I am a strong problem-solver and can work collaboratively with team members to design and develop innovative software solutions.

Thank you for considering my application. I am excited about the opportunity to bring my skills and experience to your company and contribute to its success.

Sincerely, Juan Carlos Rojas, CA

Summary

Skilled computer programmer with a passion for solving real-world problems. Experienced in software development principles and methodologies and proficient in a wide range of programming languages, including HTML, CSS, React, JavaScript, C#, C++, TypeScript, PHP, Python, Swift, and NoSQL. Strong problem-solving skills and ability to work collaboratively with team members to design and develop innovative software solutions.

Education

George Brown College, Toronto, ON

Computer Programming and Analyst, In Progress (Expected graduation Feb 2023)

Relevant coursework: Semester 1,2 ,3,4 & 5

- ⇒ Designed and developed a customer relationship management website using Laravel, receiving a perfect score and demonstrating strong problem-solving and development skills
- ⇒ Analyzed, developed, and maintained robust computing system solutions through validation testing and industry best practices

Skills

- ⇒ Proficient in HTML, CSS, React, JavaScript, C#, C++, TypeScript, PHP, Python, Swift, and NoSQL and Laravel
- ⇒ Strong understanding of software development principles and methodologies, including agile development practices
- ⇒ Experience developing and implementing algorithms to solve complex problems
Familiarity with software development tools, including Visual Studio, PyCharm, and Android Studio
- ⇒ Proficient in version control systems such as Git, and experience working collaboratively with remote teams using GitHub
- ⇒ Familiarity with cloud computing platforms such as AWS, Azure, and Google Cloud Platform
- ⇒ Knowledge of database design and management, including experience with SQL and NoSQL databases
- ⇒ Ability to work collaboratively with team members and communicate technical concepts effectively, both verbally and in writing
- ⇒ A passion for learning and staying up-to-date with the latest technologies and programming languages

PROFESSIONAL EXPERIENCE:

Foam Molded Flex Producer | RealForm Technologies | Toronto, ON | January 2020 – Feb 2022

⇒ Demonstrated strong time management skills by prioritizing the creation of the required number of products to meet business targets and ensuring timely delivery.

⇒ Proven ability to check and qualify the quality of created products and make necessary improvements, as well as ensuring that teammates' products meet the company's high-quality standards.

⇒ Fostered teamwork by supporting and mentoring new team members and reviewing their work to identify and correct errors.

⇒ Integrated acquired knowledge to develop and propose effective solutions to upcoming problems while adhering to established protocols and standards.

Computer Freelancer | Toronto, ON | June 2021 to Nov 2021

⇒ Consulted with clients to understand their website design requirements and vision, and provided technical solutions to bring their ideas to life.

⇒ Developed marketing strategies, established brand identity, set appropriate pricing, and built and maintained networking websites.

⇒ Demonstrated excellent attention to detail and ability to complete tasks according to requirements and deadlines.

⇒ Used a logical approach to tackle complex projects and explained technical concepts clearly to clients.

VOLUNTEER EXPERIENCE:

Community | Toronto, ON | August 2020 to Feb 2023

⇒ Proficiently operated standard gardening equipment and hand tools, including a wheelbarrow and garden cart.

⇒ Maintained the desired level of grass and ensured the upkeep of the community garden.
